Cloud & DevOps Engineer

Cloud & DevOps Engineer with 5 years of experience designing, automating, and managing enterprise cloud infrastructure on **Microsoft Azure**. Hands-on experience with **Azure DevOps, Terraform, Kubernetes (AKS), Docker, GitHub Actions, CI/CD, Infrastructure as Code** and **cloud automation**.

Experienced in building production-grade deployment pipelines, containerized application platforms, self-service deployment solutions, secure secrets management and automated Azure infrastructure. Strong experience with **Azure Container Registry, Azure Web Apps, Azure Functions, Logic Apps and Azure Key Vault**.

Proven track record of automating enterprise deployments, improving release reliability, reducing manual intervention and strengthening cloud security. Azure certified with **AZ-900, AZ-104 and DP-203**, with additional Databricks certification.

WORK EXPERIENCE

LTIMINDTREE | CLOUD & DEVOPS ENGINEER

MAY 2025 – PRESENT

- **Architected and implemented a self-service Power BI application deployment framework** using Azure Logic Apps, Azure DevOps, Azure Key Vault, and the Power BI REST API, eliminating administrator dependency while enforcing enterprise governance and security.
- **Engineered a centralized secrets management solution** to securely synchronize application secrets into Azure DevOps through Azure Key Vault, reducing manual credential handling and strengthening security compliance.
- **Designed and developed an automated Azure Databricks token rotation platform** that securely renewed access tokens and synchronized them with Azure Key Vault, eliminating manual maintenance and preventing production authentication failures.
- **Built production-grade CI/CD pipelines** using GitHub Actions, Docker, Azure Container Registry (ACR), and Azure Web Apps, enabling automated deployments with rollback capabilities for reliable production releases.
- **Containerized enterprise applications using Docker** and established an automated deployment pipeline through Azure Container Registry and Azure Web Apps, accelerating release cycles and ensuring deployment consistency.
- **Implemented and managed container orchestration on Azure Kubernetes Service (AKS)** using Azure Container Registry, enabling scalable, resilient, and cloud-native application deployments.
- **Collaborated with solution architects to author Application Engineering Documents (AED) and Technical Interface Design (TID) documents**, translating business and architectural requirements into production-ready cloud solutions.
- **Administered Azure DevOps repositories, pipelines, artifacts, and release workflows**, improving build reliability, release governance, and deployment efficiency across multiple environments.
- **Designed secure service-to-service integrations** using Azure Key Vault, RBAC, and Managed Identities, strengthening application security while eliminating hard-coded credentials.
- **Developed enterprise automation solutions** that streamlined deployment workflows, reduced manual intervention, and improved operational efficiency and deployment consistency across development and production environments.

INFOSYS | CLOUD ENGINEER | SEP 2021 – MAY 2025

Cloud Engineer (Mar 2024 – May 2025)

- **Developed Infrastructure as Code (IaC)** using Terraform to provision and standardize Azure infrastructure, enabling consistent and repeatable cloud deployments.
- **Designed and deployed Azure Function Apps** while integrating Azure services to deliver scalable, event-driven cloud solutions.
- **Implemented secure Azure File Share solutions** with Active Directory authentication, improving enterprise data accessibility and access control.
- **Configured SSL certificates, Azure Key Vault integrations, Linux Cron jobs, and Azure DevOps repositories**

System Engineer (Oct 2022 – Mar 2024)

- **Designed and optimized Azure Data Factory (ADF) pipelines** for enterprise-scale data ingestion, transformation, and orchestration.
- **Engineered reliable data migration pipelines** from on-premises systems to Azure Data Lake Gen2, improving data integrity and operational reliability.
- **Developed complex pipeline dependencies and linked services** to orchestrate resilient and fault-tolerant ETL workflows.
- **Troubleshooted and optimized enterprise ETL pipelines**, improving workflow stability, performance, and maintainability.

PERSONAL PROJECTS

SINDHURUNNERS MARATHON PLATFORM (<https://www.sindhurunners.com/>) • DEC/2024 – PRESENT

- Designed, developed, deployed, and currently maintain a responsive marathon registration platform hosted on AWS, supporting participant registration and event management.
- Implemented responsive UI using HTML, CSS, and JavaScript with cloud-hosted deployment.

CERTIFICATIONS

AZURE FUNDAMENTAL (AZ-900)

Microsoft Azure

AZURE ADMINISTRATOR ASSOCIATE (AZ-104)

Microsoft Azure

AZURE DATA ENGINEER ASSOCIATE (DP-203)

Microsoft Azure

DATABRICKS CERTIFIED DATA ENGINEER ASSOCIATE

Databricks

SKILLS

CLOUD & DEVOPS: Microsoft Azure, Azure DevOps, Terraform, Kubernetes, Azure Kubernetes Service (AKS), Docker, GitHub Actions, CI/CD, Infrastructure as Code

AZURE SERVICES: Azure Container Registry, Azure Web Apps, Azure Functions, Azure Logic Apps, Azure Key Vault, Azure Data Factory

SECURITY & IDENTITY: RBAC, Managed Identities, Active Directory

AUTOMATION & SCRIPTING: Python, PowerShell, Bash

VERSION CONTROL: Git, GitHub, Azure Repos

DATA & ANALYTICS: Power BI, Azure Data Lake Gen2

EDUCATION

BACHELOR'S DEGREE IN COMPUTER ENGINEERING • JUL/2021 • 8.6 CGPA

New Horizon Institute of Technology and Management • Thane

PUBLICATIONS

HEALTHCARE ANALYTICS USING ENSEMBLE LEARNING • JUL/2021

International Journal of All Research Education & Scientific Methods
